

SPRING BRAKES/SLACK ADJUSTERS

SPRING BRAKES AND POWER CHAMBERS

Available in all sizes including primary 24/30, 30/30 and made to exacting standards and materials with 3mm reinforcement plate on each mounting bolt. Available in both serviceable clamp and non serviceable or sealed clamp type and are all individually tested and inspected prior to despatch.

MANUAL AND AUTOMATIC SLACK ADJUSTERS

Comprehensive range of North American and European type slack adjusters precision made gears and drives to suit 10, 28 and 37 spline available upon request. All are checked and tested to ensure functionality and conformity.

CAMSHAFTS

Range to suit FKH models and various other makes on the market. Our cams feature milled heads with the splines, journals and head all induction heat treated. Journals are precision ground for precision, low friction and increased bearing area. Cams are straightened and machined surfaces are processed in sequence to insure virtual zero run out.

K Hitch spring brakes/ slack adjusters

The Khitch range of spring brakes, slack adjusters and cam shafts cover not only the axles manufactured by Fuwa but also offers a comprehensive range of North American and European models and all carry a 12 month guarantee of workmanship and material.

Fuwa and Fuwa-BTC are ISO/TS 16949:2002 certified and our products meet and exceed all relevant SAE standards including SAE J1469 and J2138 for spring brakes and J1462, J1513 for slack adjusters. Fuwa-BTC has also passed TUV and American Brake Dynamometer testing requirements.

Khitch have also had our spring brakes analysed and certified here in Australia to ensure conformity to Australian requirements.
