Watson & Chalin. *Leadership in suspension technology*

The Watson & Chalin **TA SERIES AIR SUSPENSION** is a fabricated modular design that can be fitted with any axle configuration within the FUWA K Hitch range. The multifunctional rubber bush, specifically designed to allow for increased ride stability, allow correct articulation of the suspension by way of specifically designed voids within the bush. The reinforced eccentric pivot alignment feature ensures ease of wheel alignment and integrity of the unit. The TA suspension is standard with reinforced shock mounts to cope with the Australian Road Friendly Suspension requirements.

TA-250T - OVER SLUNG

TA-250U - UNDER SLUNG
